

StarHGH.com Access Log Evidence

The times listed in entries below are 10 hours ahead as my web host is in the Russian Federation.

Red Highlights: Show a bunch of IP addresses in other states besides Oregon (or from IP addresses where the state is suspiciously hidden) visiting my website before and after I took my postcards to the post office for distribution. This is not right at all as the postcards were supposed to be going only to 263 doors in Oregon for a test of the profitability of my offers. And I did not submit the websites to any search engines yet so I should be getting basically no traffic except for any occasional Google bot.

So many visitors form other locations besides Oregon is evidence of a criminal conspiracy. If there were legitimate reasons for me to have an open case where they can intercept my mail and examine it, why would they go through all the trouble to convince me that they mailed my circulars. This can only be because they are trying to obstruct my money making ventures because they are afraid I'll raise the funds to sue them and/or they know the case was illegally opened/reopened in the first place. If it Washington orchestrating or cooperating in the conspiracy, and I am on a watch list, this seems also to be evidence that they have not legitimate reason to have me on a watch list and they know it. Or else why fraudulently and incompetently try to convince me that my postcards where distributed? And even if they reason is legitimate, there is nothing that gives the government the power to permanently confiscate and/or destroy a citizens US mail in an effort to destroy his business. This is illegally and racially motivated if happening, and if so, they know it.

Green Highlights: Show the two visitors from Oregon when they should all be from Oregon.

Yellow Highlights: Show too many visitors from foreign countries.

Grey Highlights: Show bots and web crawlers (irrelevant).

My on IP visitation records have been removed.

2017.09.15 00:05

199.58.86.211 [Leaseweb USA, Manassas, **VA**] - - [14/Sep/2017:03:34:39 +0300] "GET / HTTP/1.0" 200 1208 "-" "Mozilla/5.0 (compatible; MJ12bot/v1.4.8; <http://mj12bot.com/>)"

104.238.248.15 [Versaweb, LLC, Las Vegas, **NV**]- - [14/Sep/2017:10:38:14 +0300] "GET / HTTP/1.0" 200 1208 "-" "Mozilla/4.0 (compatible; MSIE 8.0; Windows NT 6.0)"

38.100.21.172 [Cogent Communications, Washington, **DC**] - - [14/Sep/2017:11:13:55 (**1:13:55AM PDT**) +0300] "GET / HTTP/1.0" 200 1208 "-" "Mozilla/4.0 (compatible; MSIE 7.0; Windows NT 5.2)"

[As you can see, IP address 38.100.21.172 [Cogent Communications, Washington, DC] paid my website a visit at or around 1:13:55am PDT. I did not take the circulars to the post office for mailing until about 9:00am PDT. Therefore I believe they know my ISP and are actively trying to brake in to my computer. I'm pretty sure I'm keeping everyone out most of the time but when I print something and I forget to disconnect from the intent first, some traffic seems to leak from my PC. (Now I see that this leak is possibly more significant than I thought. (I printed some of the circulars just before Washington paid that visit to my website)].

[I took the circulars to the post office for distribution by carrier at around 9:00am PDT. I was told they'd probably go out the next day so I did not rush to put up my websites. At around 3:00pm PDT I believe I started putting up the websites. The above entries are before the websites were up. I configured my domain to block what I assume is the secret service at IP 38.100.*.*. This changed the way my IP logs recorded visors. At first all visited listed IP first (00.00.00.00) before the rest of the information. After the reconfiguration I started getting a lot of domain name first. When brackets have been place at the beginning of the entries below, I looked up the IP form the domain entry and pasted it into the log manually. There may be a couple of errors.]
